

Crazy 8

8 rapid design concepts for Gem Finder's features

01 Gem Pulse Card

Full-screen swipeable card per attraction. Live busyness "pulse" bar + rating + operating status. Swipe up = save gem

02 Heat Zone Map

Color-block zone map of Manhattan showing busyness density. Time slider for today/tomorrow. Tap zone → nearby gems list

03 Daily Gem Feed

Styled feed: "Your gem for 10 AM" — one per time slot. Tap to confirm visit

04 Timeline Explorer

Horizontal scrollable timeline for today. Each hour shows crowd level color + open/closed icon. Tap hour → gem recommendations for that slot

05 Accessibility First Filter

Outstanding toggle on home: "Mobility-friendly only". All lists, map pins, and gems auto-filter. Clear accessibility icon on each card

06 Check-in Passport

Each check-in earns a 2.5D gem stone. Gems fill a visual "gem box". Share-worthy milestone cards at 5, 10, 20 gems

07 Weather Chatbot

Floating chat bubble. Ask: "What should I wear today?" → Returns current/tomorrow weather + outfit suggestion

08 Crowd Score Ring

Circular score ring around attraction thumbnail: green (quiet) → amber (moderate) → red (busy). At-a-glance across entire list view

PRIORITIZED CONCEPTS

Concepts 02 (Heat Zone Map), 03 (Daily Gem Feed), 05 (Accessibility Filter), and 06 (Check-in Passport) align most directly with the problem statement and Gem Finder's feature scope — these form the core design direction.
