

User Stories

As a [role], I want [feature], so that [goal]

Attraction Discovery (List)

US-01

As a tourist, I want to browse attractions by category (museums, parks, etc.) so that I can quickly find options that match my interests.

US-02

As a tourist, I want to see each attraction's current busyness level and opening status so that I can avoid wasted trips.

US-03

As a mobility-impaired user, I want to filter attractions by wheelchair/mobility accessibility so that I can plan with confidence.

Attraction Detail

US-04

As a tourist, I want to see hourly crowd predictions for today and tomorrow so that I can pick the best time to visit.

US-05

As a tourist, I want the app to highlight the "gem period" (low crowd + open) for each attraction so that I don't have to interpret charts myself.

US-06

As a registered user, I want to favorite, check in, and rate attractions so that I can track and share my experiences.

Gem Recommendation

US-07

As a tourist, I want to receive time-slot gem recommendations (high-rated, low-crowd, currently open) so that I always know the best thing to do right now or next.

US-08

As a tourist, I want gem recommendations to never repeat the same place in one session so that I discover variety.

Map & Visualization

US-09

As a tourist, I want to see a color-block crowd map of Manhattan with a time slider so that I can visualize where is less busy at any point today or tomorrow.

User System

US-10

As a new visitor, I want to register with email and log in securely so that my favorites and check-ins are saved across sessions.

US-11

As a registered user, I want a personal profile page showing my favorites, check-ins (with map), and ratings so that I can review and manage my travel history.

US-12

As a user with special needs, I want to click high-contrast mode so that the app is readable in all lighting conditions.

Admin System

US-13

As an admin, I want to manage user accounts (role, status, page divide) so that I can maintain platform rightness.
